

CASE STUDY DEPOSITION SUMMARY

THE CASE

One of SKJ Juris' clients, a US law firm engaged us to summarize plaintiff and defendant's witness and expert witness depositions recorded in a high profile case, according to the guidance and instructions given by the client. The client required SKJ Juris' team of lawyers to work on the project with high quality. The client transferred the records using a secured FTP.

THE CHALLENGES

It was a live case with voluminous witness depositions and the team was required to abridge the depositions meticulously in a very short time. Since it was a prestigious but demanding client's work, the team knew that the client would expect a 100% error free stuff.

THE STRATEGY

SKJ Juris' Project manager set up late evening meetings with the team leader and explained to him about the requirements for the project, client's instructions, and other details provided by the client. The team leader decided on the allotment of work, number of lawyers to work on the project, skills and training required. The team leader built a dedicated team of 3 most experienced lawyers and 5 junior lawyers and circulated the instructions to the team members which the team members meticulously understood. The team members worked on excel sheet and once complete, the team leader sent the finished output for review by quality checkers in SKJ Juris to ensure accuracy, brevity and clarity. After quality check is complete, SKJ Juris delivered the project to the client for incorporation into their existing case file. SKJ Juris worked on the project and had completed it within the turnaround time.

THE RESULT

The client was extremely happy with the finished output which was of fine quality and completed within stipulated reversal time.
